Vantroy Enmanuel Sánchez Paulino

Full Stack Developer | SCRUM Manager

I am passionate about computer science. I love to analyze, organize, design and develop computer systems that facilitate the work and productivity of my clients. I consider myself with high skills to communicate ideas, make agreements, anticipate problems, work and supervise teams to manage time effectively.

Application Developer Manager

INTEC Full time.

Feb 2019 - Present

- Analysis, design and development of web applications.
- Maintenance of existing systems.
- Assignment of tasks and follow-up to other developers.
- SCRUM Product Owner in multiple institutional projects.
- As a SCRUM facilitator, I have managed to foster this agile development method, achieving higher performance with a self-organized and self-managed team.
- Good planning and estimation in the projects worked.
- Revisions that fulfill the tasks requested by the clients and continuous improvements in the development of the systems.

Developer Project Lead

Aloe Software SRL Part time - Consultant

Sep 2021 - Present

- Promoting the agile development method SCRUM, I fulfill the role of Scrum Manager, ensuring the correct sizing of the assigned projects (construction and refinement of the Product Backlog), following up that they are fulfilled within the proposed time range. I do this assuming the role of SCRUM Product Owner.
- Performing sprint ceremonies in order to build a quality product. (Sprint Planning, Daily Scrums, Sprint Review, Sprint Retrospective, Sprint Refinement)

Software Developer

Banco Ademi

Feb 2013 - Feb 2019

- Analyze, design and develop web applications.
- Maintenance of existing systems.
- Proactive participation in meetings aimed at creating new applications in search of process improvement.
