Vantroy Enmanuel Sánchez Paulino

Full Stack Developer | SCRUM Manager

I am passionate about computer science. I love to analyze, organize, design and develop computer systems that facilitate the work and productivity of my clients. I consider myself with high skills to communicate ideas, make agreements, anticipate problems, work and supervise teams to manage time effectively.

Experience

Senior Software Developer

INTEC Full time.

Feb 2019 - Present

Analyze, design and develop web applications. Maintenance of existing systems. Assignment of tasks and follow-up to other developers. Daily progress reports and assertive supervision. Using the SCRUM agile development methodology, I have achieved greater performance with a self-organized and self-managed team. Good planning and estimates in the projects worked. Revisions that fulfill the tasks requested by the clients and continuous improvements in the development of the systems.

Senior Developer Lead

Aloe Software SRL Part time - Consultant

Sep 2021 - Present

Implement the SCRUM agile development method, ensuring the correct sizing of the assigned projects, following up that they are fulfilled within the proposed time range. Monitoring and supervision of developers, managing to promote an environment of productivity. Performing sprint ceremonies in order to build a quality product.

Software Developer

Banco Ademi

Feb 2013 - Feb 2019

Analyze, design and develop web applications. Maintenance of existing systems. Proactive participation in meetings aimed at creating new applications in search of process improvement.
